

# CASING SPOOLS

Casing Spools have full opening vertical bores complying with API 6A standard. They accept the interchangeable, field replaceable bit pilots which provide bit guidance for use over smaller sizes for casing. The lower flange face of these bodies is counter-bored to accept a secondary packing group. These spools have studded outlets as standard, but also can be furnished with line pipe and open-faced outlets. They will also accept test plugs and bore protectors.
